What is new in the old, old in new?
Promising tomorow's future today
or building today the legacies of tomorrow?
MARISA COHN
+ YLVA FERNEAUS
Is becoming old something we have forgotten how to do? Innovative and agile always
upgrading and adapting, running out of time, learning to forget.
e gracefully alongside our technologies and computational practices?
Embe
adition and wisdom
of building today the legacies of tomorr
Creep &cruft, or the well-olied machine? How do we age graceful
Embedded with tradition and wisdom
Good riddance to bad practices, wasted efforts, rot that's fallen away
enduring and long-lived?

What's soft in hardware?
The smooth encasement of the
Fibrous textures, wove
The skeleton for the tissues.
Metal on metal, gears and grea
tension.
rigid and durable or fragile brittle and breakable?
The cloud?
leisurely afterthought.
Physical platforms,
tactile, touchable, and grassy wires.
The fleshy fruit.
The friendly add-on or the
Bendable, pliable elastic, flexible, responsive.
the rubber meets the road.
What's hard in software?
No.
You've gone soft.
Hardcore programmers
The hard bit to the fleshy fruit
Intangible, abstract, and immaterial or tactile, to
The soft image is out of focus.
Where the rubbe
platforms, the new, the old, and the broken.
ures, woven.
code only in binary.
Is electricity
soft or hard?
and nouns.
Verbs
Machanic versus alive.
Pulling the threads, building
rs and grease.
Sturdy, rigid and d
